Reasons for Allowance

The following is an examiner's statement of reasons for allowance: Applicants' process for purifying bisphenol-A is unobvious over the prior art of record. Although the closest prior art of record teaches a similar process for purifying bisphenol-A the closest prior art or record (US Pat. 5,512,700) does not teach feeding phenol into an already purified bisphenol-A phase to form a crystalline adduct of phenol and bisphenol-A, which is further purified to obtain the final highly pure bisphenol-A. Such a modification would not have been obvious to one having ordinary skill in the art, considering that it would have been counter-intuitive to add a contaminant (phenol) to a fairly purified desired product (bisphenol-A) and, also, it would not have been obvious to know where to place such a step in a multi-step process. All claims (1-14 and 16-20) are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
